

**The finance department of the Ile-de-France region honoured again by the finance professionals
at the Digital Finance Awards on Wednesday 20 April**

At the annual ceremony, which brings together more than 200 finance departments to discover the best transformation projects in the finance function, the Île-de-France Region's finance department was awarded the prize in the 'Business Partner' category.

The jury (composed of 13 finance or transformation directors) rewarded the Île-de-France Region's finance department for its contribution to strategic issues, its modernity, its visibility and the attractiveness of the function thanks to green and responsible finance.

The 'Business partner' category aimed to highlight a project whose results produce effects directly beyond Finance, with a positive impact on the image of the function and consequently on its positioning and attractiveness.

**In addition, the Ile-de-France Finance Directorate was nominated again this year in two categories
at the 12th Finance Leaders' Summit**

after being awarded in 2019 in the category 'Public Sector Finance' and in 2021 in the category 'ESG Sector'.
